

Wetland Plant Ecology Course 2026-27

for both enthusiastic amateurs as well as trained professionals

With Damien Cook, Cassia Read and Nina Kerr

Places strictly limited

Observe the changing seasons, water depths and ecological drivers of the wetlands at Wirra-lo, the stunning conservation reserve currently being restored by Wetland Revival Trust in association with the local First Nations community.

This well-loved course is held on 3 separate days over a six-month period to focus on a different wetland habitat type associated with the different phases of the wetting and drying cycle and the changing plant communities.

2026-27 Course Dates

Each day is 9.00am - 5.00pm

Stream 1 - Wednesdays x 3

Day 1: Wednesday 28 Oct 2026

Day 2: Wednesday 2 Dec 2026

Day 3: Wednesday 14 Apr 2027

Stream 2 - Thursdays x 3

Day 1: Thursday 29 Oct 2026

Day 2: Thursday 3 Dec 2026

Day 3: Thursday 15 Apr 2027

"Fantastic introduction to wetland vegetation and ecology. If I can do the course and identify plants afterwards, anyone can!"

Day 1: October (Spring)
Sedges, Rushes and Grasses

Day 2: December (Summer)
Aquatic Plants

Day 3: March (Autumn)
Mudflat specialist plants

3 Day Wetland Plant Identification and Ecology Course

Course Structure

Each day is divided into: field trip using the coloured field guide to identify wetland plants and class time for presentations, discussion and practice using floral keys.

Lunch, morning and afternoon tea provided. All food organic, GF and vegetarian.

Course Content

- Participants will be provided with a 150 page colour wetland plant Identification field guide developed by Damien Cook and Elaine Bayes. This guide is designed to assist with easy identification of the most common wetland plants with practice using floral keys.
- At least 60% of the course will be run in the field identifying plants and discussing ecological drivers.
- Examine different wetland vegetation zones, the plant types that grow within them and what influences them (hydrology, soil type, water chemistry etc).
- Observe the same sites as they transition through the hydrological phases of full, draw-down and drying.
- Wetland plant ecology links to fauna, wetland connectivity, temporal variability (seasonal and annual) and nutrient cycling

Course Location

Based at Wirra-lo, a 200ha property undergoing restoration by Wetland Revival Trust in partnership with the local First Nations community. Field work will be conducted at the creeks and lagoons traversing the property. Course dates follow environmental water delivery supporting wetland plants.

Course Presenter

Damien Cook is one of Victoria's leading wetland experts. Damien provides wetland expertise in the form of plant surveys, wetland condition assessments and biodiversity planning for organisations across Victoria. He has been instrumental in planning and delivering some of the largest and most complex ecological restoration projects to date in Australia. Damien has been recognised with an award for restoration excellence by the Society for Ecological Restoration Australia. He is currently a Director of Wetland Revival Trust.

Damien will be joined by ecologists **Cassie Read** and **Nina Kerr**.

About Wetland Revival Trust

The Wetland Revival Trust (WRT) is a non-profit, charitable organisation dedicated to wetland restoration. It was formed in 2019 by Damien Cook and Elaine Bayes. WRT undertakes wetland monitoring and restoration throughout northern Victoria with Traditional Owners particularly focused on the land of the Barapa and Wamba people. All surplus funds are dedicated to wetland conservation. This has allowed the purchase, restoration and management of the 170 hectare Wirra-lo wetland conservation property in Murrabit West.

To find out more about WRT or to donate towards wetland restoration projects visit wetlandrevivaltrust.org.

Booking changes: You may nominate an alternative attendee for the course or any day of the course should you not be able to make it. Unfortunately, no refunds or partial refunds will be made for any cancellation made less than fourteen (14) days before Day 1 of the course, or for non-attendance at the course. We are unable to defer or carry over bookings to a future year.
